Work Experience

TATA CONSULTANCY SERVICES LIMITED
Designation: Programmer
Service Period: October 2020 – November 2021
- Worked in Python & Java Programming during the training period.
- Worked in Project Management Operations Team (PMO) as Onsite SPOC.
- Due to my diligence towards technology, have provided my team with an **automation tool** through which multiple reports could be made automatically in the background only by updating a single file.

Languages Known

- C
- Java
- Python
- React JS
- React Native

Projects

- **Title:** 2-Minute-News (News-App)
  Platform: React Native, Google Firebase, Expo Go
  Description: A news app that tells you about all the ongoings from all over the world in under 2 minutes. News can be fetched in general or by selecting categories and sources as desired.

- **Title:** Real-Time Chat Application (Chat-App)
  Platform: React Native, Google Firebase, Expo Go
  Description: Users are able to chat with the contacts that have an e-mail. Supports sending Images, videos and emojis. Direct-Photo mode is also available to send images directly.

Utilities Developed

- A **Voice Assistant using Python** that does stuff like playing a song on YouTube, telling jokes, telling date/ time etc.

- A **File-Organizer** that organizes the workspace based on file extensions and categorizes them into different folders.

Certifications/ Trainings

- Six-week training in "Hybrid Application Development"
- Six-week training in Cyber Security (CCSA)
- One-week training in "IT Security"
